

Unitrends Cloud Services

Flexible cloud-empowered storage, backup copy, and retention

The Unitrends Cloud offers data protection, backup copy, and disaster recovery, and business continuity solutions that empower our Recovery-Series purpose-built backup appliances and Unitrends Enterprise Backup software products with secure, automated, and cost-effective cloud capabilities. Simply connect your Unitrends physical or virtual appliance to the Unitrends Cloud and automatically get off-site storage of your backups.

Unitrends offers multiple cloud storage options to fit any need. Options include No Limits Cloud™, Forever Cloud™, and Metered Cloud. Whether you are looking for off-site storage for Disaster Recovery or require long term retention for regulatory and compliance reasons, Unitrends Cloud is flexible and affordable.

Choose your Unitrends Cloud option:

No Limits Cloud

Our No Limits Cloud offers cloud storage that dynamically scales to the capacity of your on premise Recovery-Series or Unitrends Enterprise Backup appliance. All of the data stored on your appliance is replicated in the No Limits Cloud.

Forever Cloud

Forever Cloud for long term retention allows users to copy on-premise backups to the highly available Unitrends Cloud, an infrastructure designed to keep backups for an infinite number of years. This removes the burden of long-term retention management from you and extends on-premise retention to the cloud, reducing capital expense and operating costs while providing a cost effective alternative to sending tapes off site for long term retention. Available in 500 GB increments, Forever Cloud is based on protected capacity of your Unitrends appliance and stores a preset number of daily, weekly, and monthly backups and infinite number of annual backup for one base price.

Metered Cloud

Metered cloud keeps a single copy of your most recent backup in the Unitrends Cloud for a pay as you go DR option. Storage is available in 250 GB increments.

DISASTER RECOVERY SERVICES (DRAAS) ADD-ON

Streamline your DR practices and simplify your infrastructure with backup and recovery in the cloud. No Limits Cloud and Forever Cloud can be enhanced with optional Disaster Recovery as a Service (DRaaS) and ReliableDR. DRaaS allows for the rapid spin-up of critical applications within the cloud at a cost significant lower than building a second DR environment. ReliableDR ensures that critical recovery SLAs are being met at all times via automated, application level testing in our DR environment.

Figure 1: Unitrends Cloud and Disaster Recovery Services

Secure Unitrends Cloud services include:

- Redundant cloud storage ensures availability of your data.
- Retention options so you can satisfy internal policies and industry regulations.
- Advanced WAN Optimization (WO) and in-flight deduplication means that your data transfers to the cloud faster, with less drag on your network.
- Configurable security options with AES-256 encryption capabilities for data in-flight and at-rest.
- Rapid deployment in a matter of minutes with the same replication and archive wizards as Recovery-Series and Unitrends Enterprise Backup on premise appliances.
- Optional seeding available to quickly establish the initial data set in the cloud.
- Hosting in secure SSAE 16 certified data centers for your peace of mind.

UNITRENDS CLOUD SERVICES COMPARISON
