Using Boomerang for Disaster Recovery & Backup

Get your pivotal VMs back. Fast.

After the initial VM seeding, ongoing delta synchronization can be activated through simple scheduling policy. Disaster Recovery testing can be easily conducted via 'One-click Recovery' of Protection Groups or VM replicas from S3 storage into AWS EC2 running instances in a matter of minutes.

Steps to Recover & Backup

To set up a backup and disaster recovery solution:

1.) Setup Protection Group and simply add important VMs to protection group

Name your protection group and determine settings

Select the VMs for your protection group

2.) Replicate Protection Group, you now have a copy of your VMs in AWS S3

Replication Progress

unitrends.com
3.) Deploy Protection Group, this ignites your back up from S3 into a live system now running in AWS.
