

Unitrends Office 365 Total Protection

COMPLETE OFFICE 365 SECURITY – BACKUP, DARK WEB MONITORING AND PHISHING DEFENSE

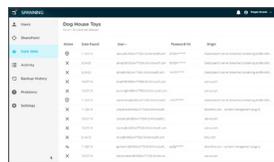

At a time when workforces are nearly 100 percent remote and cloud email adoption is at an all-time high, businesses have an even greater need for strong cybersecurity defenses to avoid devastating data breaches and financial consequences. Protect your C-suite or entire organization end-to-end Office 365 protection, available in one cost-effective package. Unitrends offers the industry’s most comprehensive data loss protection solution for Office 365, including best-in-class backup, stolen credentials alerting, and phishing defense. This automated, AI-powered platform quickly alerts you to security threats so you can act before your data or network is compromised. Our Office 365 total protection includes cloud backup and fast recovery for email, files, and calendar. Seamless backup and intuitive recovery tools greatly reduce the burden for overstretched IT staff now responsible for distributed workforce.

WHAT’S INCLUDED

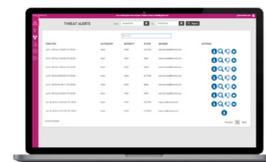

End-to-End Office 365 Backup

Get daily, automated backup with unlimited storage and point-in-time, granular restore of mail, calendar, OneDrive, and SharePoint. Recover a lost or deleted email in seconds instead of hours with fast search and an intuitive interface built for recovery. Unitrends Office 365 total protection lets you reach back in time as far as you need and restore files with ease. Plus, you can restore folders, calendars, or entire mailboxes, which is not available with Office 365’s built-in archiving and backup tools.

Stolen Credentials Protection

Defend your organization from the constantly evolving threat of unauthorized access via stolen passwords. The Unitrends Office 365 total protection package includes built-in dark web monitoring that alerts you of compromised or stolen credentials. These automated alerts enable you to quickly take proactive steps to secure those accounts before any malicious activity occurs. You can then leverage integrated audit, reporting and search capabilities to determine if data loss has taken place and restore any corrupted data in just a few clicks.

Automated Phishing Defense

Protect your users and network against the onslaught of malicious email with our powerful automated phishing defense platform. Unitrends Office 365 total protection now includes a simple, automated, and powerful email security and phishing defense in one cost-effective platform. Patented AI technology defends Office 365 inboxes from a variety of threats delivered via email, including phishing and spear phishing, business email compromise (BEC), account takeover (ATO), identity spoofing, malware and ransomware. Our phishing defense platform can be activated in mere minutes across an entire network without any email routing changes and reduces the total IT ticket volume by integrating seamlessly into help desk operations through workflow automation.
