

As you may have heard, the following products officially reach their end of life as of on 4/30/2019:
Unitrends Virtual Backup, PHD Virtual Backup, ReliableDR

This EOL is an important part of the product life cycle that ensures our customers are taking advantage of important innovations in our products. If you are still using these products and have a valid support contract, we encourage you to take advantage of the [EZPass program](#) **before April 30, 2019** to easily move to the latest Unitrends products. You'll see dramatic improvements in backup and restore performance, UI simplicity, and integrated recoverability testing.

For a limited time, legacy Unitrends and PHD Virtual software customers can migrate to our new licensing model – FREE – or upgrade to a more robust license for a small fee.

Product	Migrate to Essentials	Migrate to Standard	Migrate to Enterprise	Migrate to Enterprise Plus
