

# UNITRENDS COMPLIANCE MANAGER GDPR DATA SHEET

## Industry's Only Automated GDPR Compliance Tool

If you are in the European Union you already know your organization must follow the mandates of GDPR. GDPR is a law passed by the European Union to which all states have agreed to adhere. Any company that processes or retains European citizen data is subject to enforcement. With such a wide net, how do you know you can comply?

There are many products on the market that provide a laundry list of tasks you must perform. But Unitrends Compliance Manager (UCM) takes the process to the next level by automating the collection of the data, analyzing it for you, and providing you with dynamic worksheets that are customized based on your data.

UCM guides you through a four step process:

### 1. INITIAL ASSESSMENT

Scan your network and answer expert questions to quickly determine if GDPR requirements are being met, and if not, what needs to be done.

### 2. REMEDIATION SERVICES

Document and prioritize issues that must be addressed to solve GDPR-related security vulnerabilities.

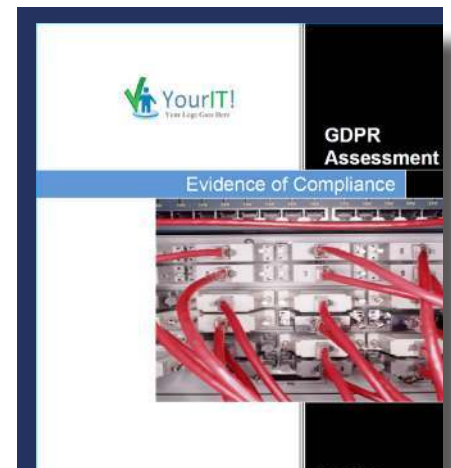

### 3. APPROVED DOCUMENTATION

Produce all mandatory reports as required by GDPR and be prepared, in advance, to pass an audit.

### 4. ONGOING COMPLIANCE

Regular, automated network scans detect any issues or threats, and alerts you if one is found.

Unitrends Recovery Assurance documents your backup and recovery success, but UCM covers the rest. Never fail a GDPR audit!

Customized Reporting

When you combine your IT knowledge with the subject matter expertise built-in to Unitrends Compliance Manager, you have everything you need to meet GDPR compliance standards and pass an audit.

Benefits include:

- **Automated Scans** - Removes human error by having the software perform the technical data collection.
- **Role-based Assignments** - Divides the workload into three primary roles: Internal Auditor, Technician, and Site Admin.
- **Online Forms and Worksheets** - Forms are created using data from the actual network and not just a generic checklist.
- **Task Notification** - As tasks are assigned, stakeholders are notified via email. This makes performing the assessment process a no-brainer.
- **Auditor Checklists** - Easily assesses your compliance position and gives you a document to show Auditors to help them see how you doing.
- **Information Policies and Procedures** - A standardized P&P that is designed as a starting place for organizations that might not have a P&P.
- **Risk Treatment Plans** - Shows what issues were found and tracks which issues were addressed based upon risk scoring methodology.
- **Compliance Guidance** - Unitrends Compliance Manager presents in-product guidance to help you complete the assessment.

Non-compliance fines are large. Your organization should not be without this level of compliance audit and reporting capabilities. Contact your Unitrends Account Manager to find out how affordable advanced GDPR compliance assessment and reporting can be.
