

UNITRENDS CLOUD BACKUP

SIMPLE PROTECTION FOR YOUR MOBILE WORKFORCE

Secure Endpoint Protection for Your Global Team

Unitrends Direct to Cloud Backup is a simple, cost-efficient way to protect and secure laptops, PCs and other endpoints connected to your corporate network. Use alone or as a complement to your Unitrends all-in-one backup appliance.

Enterprise Class Data Protection Isn't Just for Servers Anymore

Protect end-user and server data in your distributed environment without the hassle of setting up an appliance or providing local storage at every office location. Unitrends Cloud Backup is the simplest way to backup from anywhere with Internet connectivity – including WiFi – to protect employee endpoints regardless of their location. End users simply download and start backing up. Recovering data is simple too. End users or IT admins can initiate recovery from any Internet connected location. You get hassle-free recovery, and no one has to drive to the office.

Everything You Need for One Simple Price

Up to 1 TB of cloud storage is included with each workstation, more than enough for even your largest endpoints. No fees to access your data or restore files, and recovery is self-service. No surprises. No gotchas. Just simple, cost-efficient endpoint protection.

The screenshot shows the Unitrends Cloud Backup management console. The interface includes a navigation sidebar on the left with options like Home, Direct To Cloud, Monitor, Backup, Recover, Report, and Configure. The main content area is titled 'Backup Status' and displays a table of backup results. The table has columns for Asset Name, Asset UUID, Operation, Status, Protected Time, and Snapshot Time. All operations shown are 'FULL' and 'SUCCESS'.

Asset Name	Asset UUID	Operation	Status	Protected Time	Snapshot Time
windows-test-system	c23e284c-2d58-4bf0-b4d7-	FULL	SUCCESS	Today at 2:13 PM	Today at 2:13 PM

The intuitive Unitrends Cloud Backup management console makes protecting laptops and servers easy.

Hands-Off Protection for Windows Endpoints

Unitrends Cloud Backup is a simple, cost-efficient way to protect and secure endpoints and other network connected devices, saving your organizations hours of lost productivity. Use Unitrends Cloud Backup alone or to complement your Unitrends all-in-one backup appliance. Now supporting Windows 8 and later with support for many more operating systems coming soon.

Secure Cloud Protection for Your Global Team

Use Unitrends Cloud Backup for endpoints and files that don't need to be on a traditional backup appliance. Use Unitrends Cloud Backup alone or as a complement to Unitrends backup appliances.

End User Productivity

Protect critical data on your end users' laptops and remote PCs, regardless of location. With simple backup to the Unitrends cloud end users spend less time dealing with complex backup processes or suffering the consequences of lost data.

Simple Deployment

Provide enterprise-class protection for your endpoints in minutes. End users simply download a backup agent and start backing up their endpoint data directly to the Unitrends Cloud.

Save Money, Reduce Complexity

Get data loss protection for endpoints without the need for local storage.

Flexible Recovery

Initiate recovery from any location with an Internet connection, including WiFi, so no one has to drive to the office. End users can recover their own data with self-service software or with the help of an administrator.

Restore Data Where You Need It

You can restore files to the original endpoint or to a different device running our backup agent.

Multitenancy Reporting

Reporting designed to help enterprises and MSPs track utilization and charge back to departments or MSP customers.
